

Instructions

Cancer and diabetes patients drink 3 ounce shot glasses in the morning before you eat and 3 in the afternoon. It's that simple.

Natural Meds you will need to get. Follow instructions on the bottle. They can be bought at health food store that sells organic natural meds, or on line. **DO NOT** take the natural meds if you are taking drugs from a doctor. Tell him you want to take the natural meds. Hang firm. The doctor **only manages** your disease with drugs which make it worse. I have a lot of stories about what doctors can do to you. Have you ever heard of a doctor curing diabetes? They are paid by drug companies to sell you drugs. Ever read the side effects of these drugs? You can see them daily on the TV.

The list of some of these natural meds are below. Enclosed you will find a description of each. Follow the instructions on the bottle. Please remember, Children cannot take as much as an adult. It is usually half the dose of an adult

1. Moringa (Cancer and kidney problems)
2. Black seed oil (great for diabetes also)
3. Grape Seed Extract(Cancer)
4. White Willow Bark(All) What aspirin is made out of
5. Wild Lettuce Extract(for Pain)
6. Billbery(For Diabetes Only)

7. Gymnema(Diabetes only)
8. Fenugreek(Diabetes only)
9. Echinacea /Goldenseal combination- For Infections including cancer and diabetes infections

Go on youtube. Type in Diets for Diabetics and Type in vegan food. There are many yummy things that are done with veggies. **You cannot go vegan overnight.** I only know of one guy that did as He had stage 4 colon cancer. In almost exactly two months , he was totally cured and not from a doctor. He refused to go to a doctor.

Note: We had an 8 year old girl with herpes of the mouth. They went to the doctor. He was unable to help. At the time we took over she was losing weight and lots of sores in her mouth. She is now practically cured and now gaining weight. God is good! We treated her with Nano-silver, Goldenseal / Echinacea tea. And the natural meds.
